

Domain Name Composition

Definitions

In this document:

ICANN means the Internet Corporation for Assigned Names and Numbers, its successors and assigns.

Service means the services that we provide in relation to the TLD.

TLD means Top Level Domain and for the purpose of this policy the TLD shall be .physio

We, us and **our** means Phys Biz Pty Ltd ACN 146454748 or our designated representatives.

You and **your** means the person or entity accessing the Service.

About this document

This document describes our policy regarding how domain names in the TLD are to be composed.

Document Identifier: Domain Name Composition Policy - 1.0

Publication Date: 7 July 2014

Status: Current

Purpose

The purpose of this document is to describe our policy on domain name composition, to make users of the Service aware of how domain names in the TLD are composed.

We have developed this policy with reference to applicable industry standards, ICANN mandated requirements, and to meet our operational requirements for the TLD.

Composition of domain names

What a domain name looks like

General information about domain names

In the operation of the TLD we use the word 'label' to describe a sequence of characters.

A domain name is made up of one or more labels, separated by a period ('.'), before the TLD, for example name.tld.

Labels that may be used to make a domain name are subject to composition requirements described in this document.

Levels of domain names

Domain names are often described in relation to their 'level': A 'second level' domain name consists of one label before the TLD (for example name.tld).

Composition requirements

The Service validates all domain names that are created, to meet the technical composition requirements described in this section.

Composition requirements for domain names

Applications for domain names must conform to the following set of requirements. Each label in the domain name must:

- Have a minimum of 1 to a maximum of 63 characters;
- Only contain letters (a-z, A-Z), digits (0-9) and hyphens (-) or a combination of these;
- Begin with a letter or a digit and end with a letter or a digit;
- Neither begin with, nor end with a hyphen (-);
- Not contain hyphens (-) in the third and fourth positions (e.g. www.ab - - cd.tld), and
- Not include a space (e.g. www.ab cd.tld).

Definition and review

This document has been prepared and published to represent our policy regarding the administrative and technical management of the TLD.

We may discontinue or amend any part or the whole of this policy from time to time at our absolute discretion.
